I enclose Richards letter. I asked him whether it would not be possible for him to abstain from any positive statement of his opinions until he had heard my arguments at length. You see from his answer that the matter seems to be urgent. I will write to him so that he will receive the letter on Monday morn. Could you not send for him to call on you and talk it over? My letters will do so little good because I do not understand the exact conditions. The weak point in his argument seems to me this: — there is of course no objection to the

instructors of the woman's medical College arranging their older students into
squad of four or five and making that part of the "required" work of the
course, but this is wholly different from the Faculty's basing their action
(as Richard certainly does privately) upon the principle that medical co-
education is to be discouraged. It is moreover very desirable that an ad-
vanced woman student, or a young woman physician practicing in Baltimore
should have the privilege of attending any specially interesting clinic. The
men are immensely in the majority, they have not only the most noted
instructors but all the test operations and critical cases will be saved for
the professors and students of the Maryland Univ. To these operations women might
be admitted by special request of the professor, who by the terms of the grant
"the same privileges" ~~wanted~~ ^{addressed to} would feel morally bound to grant the request
unless the Faculty of the Woman's Med. College take the illiberal position.
When the effort has been made and additional money subscribed for
the sake of women's medical education, they are morally bound not to take
such a position - and I shall tell Richard so, with more emphasis than you
might perhaps feel like using; but it would do a great deal of good if you
would talk to him too. One cares so much about it because ~~it~~ their position
will certainly affect the Johns Hopkins question. Thanks for the books, you

to express them but I will take further
mail you your pen. Please write
me word so that we may receive it
Monday whether we may, or whether
you will, write to Mrs Ordway or
Miss Conroy. Let us try them first; hear
what Mrs O'Grady says about them!

Mame refuses to let me answer
Mrs Dame's note; we stand one to
one; but I supposed it was decided
that we were to make every effort
to find some one else. I do not regard
Miss Andrews desire to give up the
reading; it is nothing new. At Xmas she
spoke very decidedly and I, as decidedly,
told her there was no help for it. We
much, I think, insist upon her keeping
it. There is no ~~such~~ news except that
I had a fire in my flue and have
had a weasome series of people to
luncheon - three, ^{lunches} within one week.
