SENIOR PLAY, "IF I WERE KING" EIGHTEEN OCCUPATIONS REPRESENTED BY EXPERTS AT CLASSES THIS WEEK-END WILL ANNUAL WEEK-END VOCATIONAL CONFERENCE

Value of College Training and Question of Salaries Discussed Program

With eighteen speakers representing as many fields of work, ranging from psychology to playwriting, and including labor adjustment, interior decoration, law, teaching, etc., a vocational conference was held at Bryn Mawr last Friday afternoon and night, and Saturday morning. The speakers' emphasized the need of college training for work in aimost every field, and also showed that sex prejudice was fast disappearing, and that women were being recognized in all lines of work. The conference was planned and arranged by Dean Smith.

day and age is appalling," said an emi- he will get more out of the deal than if nent New Yorker the other day. We hope he considered John Smith simply as so that this gentleman read in his Monday much more help'." Times the principles of an intercollegiate liberal organization proposed by the conference of student delegates held at Cambridge, last Saturday. A banding together of students is significant. Their organization for "the cultivation of the open mind and the development of an informed student opinion on social, industrial, political and international questions" is still more so. We earnestly hope that Bryn Mawr will not be the last to shake off the damning "indifference."

This winter Bryn Track an Intercollegiate Sport Mawr played two inball games, initiating a new custom. Track is a sport that has perhaps more records tics, language (notably French and Spanthan any other established throughout the world. Now that the athletic board has reduced the events in order to avoid the painful "charlie horse" and to make the spring schedule less scattered, there is real opportunity for developing it as a sport. Although track lacks the immediate competition of games, like hockey and basketball, there is a broader competition. From this point of view why should we not work it up at Bryn Mawr as we do our basketball with the hope of an intercollegiate meet some day?

People who lead a busy life Too Busy at college fall into two distinct breathless rush. These arrive at their first Baltimore Clothing Market.

behave in quite the same way. Her friend she must know all the operations that are apparent occupation. She may ask her if possible) and the conditions under which she is going to the undergraduate meeting. these go on." Miss Porter warned anyone "My dear, I positively can't," replies the who contemplated such a position against voice from the sofa, "I have got such a judging any question hastily, especially in cushions, still looking forward to a busy sense and the ability to see around and evening.

"The Development and Use of Psycho-ELIZABETH CHILD '23 logical and Trade Tests in Industry" was discussed by Dr. Joseph Hays of the Scott Company.

"The greatest value of the trades test CORNELIA BAIRD'22 method, as it is being developed in the SARA ARCHBALD'23 army and in industry," said Dr. Hays, "is that it shows what equipment a man has Subscriptions may begin at any time Mailing Price, \$3.00 today." Individual differences in people are being recognized through these tests. "At the present time the slogan, 'Hire careless and fire fast,' is in vogue again. But "The indifference of the psychologist has helped to emphasize modern college students the fact that if the employer gets acquainteu to the events of their with John Smith while he buys his labor,

Mr. Shelton Talks on Labor

"Production, Labor Adjustment and Personnel Administration" were subjects discussed at the meeting in Pembroke sitting room on Friday afternoon.

Mr. H. W. Shelton, industrial engineer, Philadelphia, spoke first on the question of production. "In considering our fitness for this kind of work," he said, "we must think not of what we are to get, but of what we can give. The great boon of college life is the chance it gives of getting the information that will help in production work; that is, especially a knowledge of tercollegiate basket- geographical and natural resource, of banking, føreign trade, law, bookkeeping, statisish) and the sciences. Sound judgment is the most necessary trait for this business, and sound judgment is the result of the background an education gives." qualities of most value in production work, according to Mr. Shelton, are a scientific mind, willingness to work with the hands, thoroughness, and a philosophical mind. "There are three fields that contribute to productive effort," Mr. Shelton said, "the physical, emotional and mental. As a last bit of advice, Mr. Shelton urged starting with small plants, for in this way experience can be gained much faster.

Judgment Needed in Labor Adjustment

"Labor Adjustment" was next discussed groups. There are those whose life is one by Miss H. E. Porter, formerly of the

class direct from bed. In their free hour "Complaints are as many as workmen," they make straight for Wallace's and break- she said, "and there is great need for spefast, arriving at their next class at exactly cial departments of employment whose nineteen minutes past. He or will find her sitting on the sofa without any carried on in the business (at first hand if frightful lot to do!" An hour passes and a case of poor work. "The position deher returning friend finds her, buried in mands, above all," she said, "good common see all sides of a question."

Employment Department Economical

The subject of "Personal Administra-Frederika Howell, '19; Darthela Clark, tion" was taken up last by Miss J. Stack-Company, Philadelphia.

She emphasized the necessity and advantage of an employment department as the only means of keeping the management in touch with the workers. "La-Dorothea Cooke, ex-'22, spent four days bor is brains and heart rather than considered," she said, "and employers are selection of labor; the organization of an employment department means economy by reduction of the number of persons trained, reduction of accidents and of the foremens' energy, and an increase in skill of the workers."

Art a Rich Field for Women

PROPOSED STUDENTS' BUILDING

etta Jameson, '17, an artist and the first and a sense of responsibility. speaker of the conference on art, landscape architecture and interior decoration, in Radnor Hall on Friday.

"The teaching of history of art is a very important work indeed," said Miss Jameson. "It would mean a great deal to the employment director of the central branch country to have people who really understand art teaching and talking about it." on Friday. Following this the question of Some practical work, as well as historical salesmanship was discussed by Mrs. Martha study, is advisable for this vocation in order that the teacher may know something Life and Trust Company. Miss Wallace of the creative point of view.

Illustration, as it exists in American magazines and books at present, is in a degraded state. It pays commercially for those who will give what the publishers demand, but anyone who wishes to follow good to start by doing stenographic work an artistic ideal, "I advise to have some business, and is a step toward secretarial other means of livlihood first," said Miss Jameson. This is also true of painting. The best way for one who really wants to paint is to have some other work, so that painting is done for its own sake. "I have heard great artists say that they look to women for a real contribution to art," Miss tions as secretary and as employment and Jameson concluded.

That industries should be run on the same basis as the government, and that everyone should have two vocations, were opinions expressed by Dr. Melish at Silver Bay.

SELF-GOVERNMENT ELECTIONS FOR NEXT YEAR COMPLETE

The two Junior members for next year in the order elected are: K. Strauss and J. Ward, F. Matteson, '23, is secretary; M. Minott, '24, treasurer, and A. Shiras is the Sophomore member.

You Have Written Poems!

Do you care to have them revised or constructively criticised by successful authors? If you do, then send us your manuscript (stories, articles or poems). We will criticise, and place them should they prove to be acceptable for publication.

There is no actual charge for our services. If, however, you have not previously enrolled with the advisory department of this association, we request that you enclose the initial fee of two dollars, which we must ask of each new contributor. There is no additional expense, no future obliga-

It must be realized that we can only be of aid to those of serious intent. If you do mean to strive for literary success, we can help you in many ways. Our services are yours until we have actually succeeded in marketing at least one of your manuscripts. Send something today!

Please enclose return postage with your communications.

Who Was Moseley?

E was a young Oxford man, only twenty-seven when he was killed at Gallipoli. Up to his time, man had I never seen the inside of an atom. He turned the X-rays on matter—not figuratively but literally—and made them disclose the skeleton of an atom just as certainly as a surgeon makes them reveal the positions of the bones of the body. Moseley proved that all atoms are built up of the same kind of matter. He saw, too, just why an atom of copper is different from an atom of gold.

Atoms are built up of electrons. Each atom consists of a nucleus, a kind of sun, with a certain number of electrons grouped about it, like planets. Moseley actually counted the number of electrons of all the metals from aluminum to gold.

When you discover what gold is made of or a new fact about electricity, you open up new possibilities for the use of gold or electricity. For that reason the Research Laboratories of the General Electric Company are as much concerned with the "how" of things—atoms and electrons, for instance—as they are with mere applications of the electric current.

Hence Moseley's work has been continued in the Research Laboratories, with the result that more has been learned about matter. How does water freeze? What is lead? Why are lead, iron, gold and tungsten malleable? Such questions can be answered more definitely now than ten years ago. And because they can be answered it is possible to make more rapid progress in illumination, in X-ray photography, in wireless telegraphy, and in electrical engineering as a whole.

There would have been no coal-tar industry without the vast amount of research conducted in organic chemistry, and no electro-chemical industry without such work as Sir Humphrey Davey's purely scientific study of an electric -current's effect on caustic potash and caustic soda. Sooner or later research in pure science always enriches the world with discoveries that can be practically applied. For these reasons the Research Laboratories of the General Electric Company devote so much time to the study of purely scientific problems.

ALUMNA, "LIVE-WIRE" IN ARKANSAS REFORM, AUTHOR OF NEW NOVEL

Mrs. Julia Bailey, '12, Publishes "Show Down," a Tale of Arkansas

"Show Down," a novel of Arkansas life, lately published by G. P. Putnams Sons, New York, is the work of Mrs. Julia Houston Bailey (Julia Bailey, '12), of Pine Bluff, Ark., who, since her graduation, has been engaged in pioneer city, county and State social work in Arkansas. She was the leader of a six-year fight for the abolition of the old State Reform School and the establishment of the present Boys' Industrial School.

Ex-Governor C. H. Brough says of the book: "It is a gripping narrative, authentic and picturesque—the best story I know set in this part of the country. Mrs. Bailey has had a material part in the social rebuilding fortunately, there are many positions in of Arkansas. She was a rural schoolteacher, organizer of social work in her Pine Bluff, and chief promoter and field secretary of the State Charities Correction the limit of their ability." Commission. Mrs. Bailey was a 'live wire' in Arkansas. Her book reflects herself."

SUPERIORITY DUE TO INNATE CAPACITY SAYS DR. ARLITT

Equality of Opportunity Discussed In Chapel on Friday Morning

Whether or not the government can secure equality for all was discussed by Dr. 1145 Lancaster Ave. Arlitt, associate professor in educational psychology, in chapel on Friday morning.

fashion that height is," she said. every crowd there is a certain number above and below the average height and above and below the average intellect. Four per cent. of the people in the United States are capable only of advancing to the fifth grade, 11 per cent. to the eighth, and a very small number to college. It is thought that a change in economic conditions would raise this capacity, but experiments have proved that no change is effected by putting an inferior person in a home of superior social status. Superiority is not due to environment, but to inhate Afternoon Tea and Luncheon capacity. This means that there are many people suited only for inferior positions; which any but a mediocre mind would be unsatisfied and unhappy. All that the government can do is to educate the people to

VASSAR PLAYERS ON ROAD GIVE SERIES OF THREE ONE-ACT PLAYS

Will be in Philadelphia April 9

Three plays of one act each will be Vincent, president of the Rockefeller given for the benefit of the Vassar Schol-Foundation, in Taylor Hall, under the arship Fund, at 8.15 o'clock on Saturday, auspices of the World Citizenship April 9, at the New Century Club, Philadelphia. The plays, written by Vassar undergraduates, will be acted by four mem-4.30 P. M.—Faculty tea to the graduate bers from 1921, who are attending classes regularly in the meantime. This is the first time that Vassar undergraduates have acted outside college. They have already visited Detroit, New York, Albany, Boston, Hartford and Washington.

The three one-act plays on their program were written by Edna St. Vincent Millay of the class of 1917, and Dorothy Stock-7.30 P. M.—Chapel.
