# ON "COSTS OF EDUCATION"

### Foreign Students Explain Youth Movements in Europe. Visit Bryn Mawr Later

Between sixty and seventy students from many Eastern and some Western colleges attended the National Student Forum Conference on the "Social Costs of Education," held in Hartsdale, N. Y., from December 26-28.

The Conference was entirely a student affair, there being no outside speakers. The ball has appeared in the pool. In England up at the center of the ceiling, were ball has appeared in the pool. In England of every conceivable bright capital for founding and endowing colleges. Since in private institutions this wealth is drawn from the profits of capitalists, labor is the unwitting source of a good which it intensiveness in the work, of attention to is a willful foul for a player to take a posi- ground for the dancers. Large oval black does not enjoy. The obligation of students the individual student, a general thoroughwhich they incur by attending college was the subject of a great deal of discussion and disagreement. Though it was generally conceded that the student has indeed a the New York Evening Post. responsiblity toward society, and that it is his duty in some way to work for a juster system of educational opportunity, yet the means by which he should do so could not be unanimously decided upon. Several people, among them Justine Wise, ex-'24, Mawr has been Martha Carey Thomas" of the best swimmers in the colleges. who is now at Radeliffe, maintained that and "Bryn Mawr's Head faces Hard Task" time for practicing this year is shorter than the only consistent course was to withdraw from an institution based on injustice. ### WILL IMPROVE GAME

### Match Games to begin on February Twelfth

The character of water polo has been somewhat changed and improved by the new rules adopted by the Athletic Association, which will be enforced in all practices and in the match games, which begin February 12th.

The rules, which are taken from the English National Water Polo Association, were brought over this fall by Miss Applebee. These rules are not the only new

It seems to the NEWS, and we believe to all undergraduates, that no honor the College could confer on President Thomas would be too great. To the directors we offer our hearty applause and to President Thomas our sincere congratulations!

#### KICKS AND KICKS

There are organic fault-finders, and imitative ones, and trivial and personal ones. if we discount these and others who naturally join the Strafe chorus at this time of year, how many will be left whose motives for criticising the methods of their education are grounded on reason? Certain it is that since last year there has been a new note among the ordinary dissatisfactions voiced at meals and between classes and in dejected intervals of study DR. SAVAGE WRITES ON COLLEGE and exercise. It is possible that this comes from students who have gone a step beyond mere objection, and have actually convinced themselves how the system could be bettered. If there are any who have done so or who think the matter important Notes, one of the publications of the help in determining public opinion. enough for thought, surely this is the American Dialect Society. time for them to speak.

The students of Mount Holyoke recently presented their faculty with an outline of what they considered an ideal curriculum. from observations made at Bryn Mawr Far from taking this as an impertinence, since 1915; in which he has been helped by the faculty was delighted, as it well might his classes. Finally, he lists over a hunbe, and found valuable suggestions in the dred common Bryn Mawr slang expresdocument. In fact, the idea that such suggestions would be anything but valuable is ridiculous. Provided the student plan is carefully weighed and shorn of extravagance, or even if it isn't, it supplies a point of view which faculties get only with difficulty, but which is of the most obvious importance.

over and modified into the nearest semblance of "undergraduate opinion" and presented to the faculty, there is not a doubt that they would be heard, and with gratitude. A little rapport between teacher and taught would not be amiss. It would take the wind from the sails of students who. flaunt their criticism as a revolt against despotic authority, and it would qualify dergraduate is a child with unconquerable aversions to study. This year of all years, while a change in the curriculum is being discussed, is the time for an honest, reasoned statement from the student body.

MODEL IN FLIGHT

## "The way of an Eagle in the air"

ENTURY after century men broke their necks trying to fly. They had not troubled to discover

what Solomon called "the way of an eagle in the air."

In 1891 came Samuel Pierpont Langley, secretary of the Smithsonian Institution. He wanted facts. His first step was to whirl flat surfaces in the air, to measure the air pressures required to sustain these surfaces in motion and to study the swirls and currents of the air itself. Finally, in 1896, he built a small steam-driven model which flew three-quarters of a mile.

With a Congressional appropriation of \$50,000 Langley built a large man-carrying machine. Because it was improperly launched, it dropped into the Potomac River. Years later, Glenn Curtiss flew it at Hammondsport, New York.

Congress regarded Langley's attempt not as a scientific experiment but as a sad fiasco and

refused to encourage him further. He died a disappointed man.

Langley's scientific study which ultimately gave us the airplane seemed unimportant in 1896. Whole newspaper pages were given up to the sixteen-to-one ratio of silver to gold.

"Sixteen-to-one" is dead politically. Thousands of airplanes cleave the air—airplanes built with the knowledge that Langley acquired.

In this work the Laboratories of the General Electric Company played their part. They aided in developing the "supercharger," whereby an engine may be supplied with the air that it needs for combustion at altitudes of four miles and more. Getting the facts first, the Langley method, made the achievement possible.

What is expedient or important today may be forgotten tomorrow. The spirit of scientific research and its achievements endure.

### WOMEN'S COLLEGES PRESENT AT INDUSTRIAL CONFERENCE

### Protection of Working Women and to be carried back to enlarge legislative thinking and reading about the society he which alone will color her story with truth Abolition of Child Labor Planned

(Specially contributed by Social Economy and Social Research)

week in Washington will be generally rated mer to become effective seems probable. and Mrs. Chadwick-Collins, head of the which a man must be a poet. As metrical as an epoch-making event. Today it is so | Throughout the conference was one very the dawning of social conscience. And to largely responsible for the spirit which this event must promise victory. For there many years at the head of the Industrial acter must be so portrayed that the reader charming and artistically done. It is an inassembled more than 350 delegates repre- Division of the Young Women's Christian recognizes it as human and in some way teresting addition to review the periodicals eight-hour day, home work, and minimum has never been dimmed. She often felt lutely true to type. There is no such thing the quantity of material that is really inand child labor legislation.

That representatives of the Clothing Workers of America and the American Association of University Women, of the Social Workers' Association and the American Federation of Labor, with numerous unions, of the Women's Bar Association and Daughters of the American Revolution, of the Catholic Women and the Jewish Women, of the National Civic Federation and the Women's Christian Temperance Union, the League of Women Voters, the Federation of Women's Clubs, the Young Women's Christian Association, the Girl Scouts, the Girls' Friendly, and the Women's Colleges-Alumnae Associations and faculties, should ever assemble for this purpose was startling. But that the whole session should have shown a practically unanimous opinion and program was astounding-but very satisfying.

Of course there were differences of opinion and there were clashes. A few delegates who belonged to the Woman's Party feebly urged equal opportunity for women, while Mrs. Swartz, of the Trade Union League, declared that to neglect insanitary conditions and long hours and low wages and strive for careers for women in industry was "bosh," for there were no careers to be had. Miss Hoagland, of the National Cash Register Company, demanded "freedom of contract" and attainment of ends by agreement between workers and their firm, while Miss Odencrantz, of Smith and Kauffman's, insisted on the need for uniform protective legislation. But these were minor counts. The important facts are that the conference committed itself by its response, and by its expression to progressive legislation for the protection of women in industry and for the abolition of child labor, and that it showed a desire to see every point of view and consider it fairly.

At first the program promised to be monotonous; the speakers unexciting. The subjects to be considered were too familiar, the speakers too frequently heard. Exactly. But the conference proved to be what Miss Mary Anderson, Chief of the Women's Bureau, had foreseen—simply a statement of program upon which to concentrate. The speakers were the highest and best authority on each topic and therefore commanded attention and respect. It was discussion for which Miss Anderson, hoped and she got it. Not controversial but committal. In one or two instances there were startling contributions—as when Dr. Spaeth of Johns Hopkins swept away the old theories that women need more health protection in industry than men (except as to maternity), although his contentions will certainly be challenged, and when Mrs. Florence Kelley characterized all efforts for regulation, limitation and prohibition of industrial homework so far attempted in this country absolute failures and declared for regulation through minimum wage laws as set forth in the Cave Report in England. Then, too, Mrs. Raymond Robins and Julia Lathrop, Mary McDowell and Mrs. Florence Kelley were never in better form.

MAE MURRAY star of "Broadway Rose," says: "After a hard day's work nothing so refreshes the face and takes away the tired, strained look as Mineralava Beauty Clay."

MARION DAVIES, star of "When Knighthood Was in Flower," says:

"Mineralavaisthe perfect way to a perfect complexion. I have tried many clays for the complexion but Mineralava surpasses others so far that I use it and it only."

### The Trinity Beautiful and its Debt to MINERALAVA

by Hector Fuller

HREE of the most beautiful women whose faces are familiar to thousands who have seen their reflections on the Silver Screen delight in telling their fellow-women the secret of their wonderful complexions.

This Trinity of Beauty, Marion Davies, Mae Murray and Priscilla Dean, are all agreed that the

greatest corrector of skin evils: the most perfect creator of health and freshness for the complexion is Mineralava Beauty Clay.

Mineralava is not a novelty. It has been in use since its discovery, twenty-three years ago by Mrs. M. G. Scott, the famous Beauty expert. When she found that this product of the laboratories of Nature had remarkable affinities for the humanskinshehadittested and tried by the most notable chemists in Europe and America who added to it certain medical ingredients of great potency, thus making it the most perfect specific for Skin Malnutrition that women have ever used.

Just what Sir Erasmus Wilson, M.D., F.R.S., the noted specialist of skin diseases, recommended in his famous work, "The Skin and Its Diseases," Mineralava accomplishes. It was Sir Erasmus who pointed out that there are two layers of human skin, the outer

called the Epidermis, which bears the brunt of weather and the exposure to dirt and grime; and the under skin called the Dermis, waiting to take its place when the old skin flakes and falls away, and which must, therefore, be nourished, stimulated and invigorated.

That is what Mineralava does so perfectly. It penetrates the myriad of tiny pores and reaching the under skin stimulates it to perfect skinhealth. It absolutely corrects Skin-Malnutrition, that disease of lack of proper nourishment from which most mature faces suffer. In place of the sallow, dead-looking complexion, lacking vivaci-

ty and beauty, it gives you a face sparkling with vigor and free from blemishes.

Mineralava Beauty Clay builds up the tiny muscles and stimulates a healthy blood circulation through the tiny blood vessels; it clears away all the eruptions, draws out the impurities, drives off pimples and blackheads; corrects oily or too-dry skin, coarse pores, incipient wrinkles and sagging muscles. It so nourishes the Dermis that when the time comes for it to take its place as the surface skin, it appears as the perfect complexion, newborn and beautiful.

Countless thousands of happy American home. women testify to the permanent qualities of Mincralava. Mineralava is a superior article for discriminating people. Originally Mineralava, was sold only in Beauty Parlors at as high as \$15 a treatment.

Today it is within the reach of every woman at

ment. Full directions for treatment and a soft brush for applying with every bottle. There is also an introductory Trial Tube of Mineralava at 50c.

MINERALAVA-makes Blemished Skin Perfect!

MINERALAVA - corrects all forms of Skin-Malnutrition!

MINERALAVA-keeps Young Faces Healthful and Rosy!

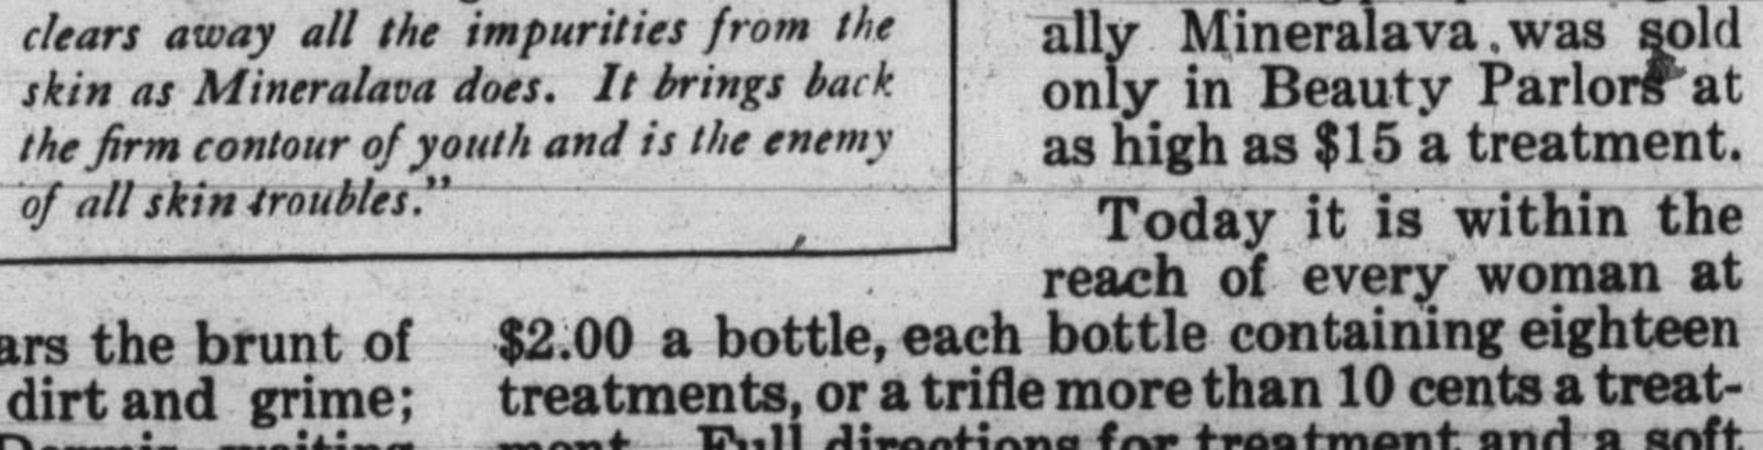

MINERALAVA - moulds Old Faces to the Contour of Youth!

Mineralava has 22 years' successful use behind it in the best homes of the country. Don't experiment with new and untried Beauty Clays. The original is your only protection.

Go to your dependable Druggist or Department Store. Ask for Mineralava Beauty Clay. If the Store does not happen to have it write direct to the manufacturers and they will see that your dealer is supplied to fill your requirements. Scott's Preparations, Inc., 251 West 19th Street, New York.
