The Return of Don Quixote, by G. K. Chesterton: Dodd, Mead and Co.

A fantasy and a satire is this recent book of Mr. Chesterton's; and the result of the combination is thoroughly charming. It is formed of such seemingly incompatible subjects as a mad librarian sitting for twenty-four hours on the highest bookshelf, studying up on medieval romance, and a heated debate about British politics with special attention to the Labor Party.

satire, this, too, satirizes modern social reformers; and, as Cervantes was swept to the life and problems of its author. away by the fantasy of his subject, Chesterton also gives us page after page of highly romantic adventures.

The story starts with both feet on the ground—a perfectly normal group of people are about to give a play, and are faced with the very usual difficulty of lacking a person for one part. From this matter of fact beginning, it rises at exactly the right rate of speed, until it reaches a height where it is not incongruous to have the feudal system reinstated in England, and the mad librarian made king.

The second was Mary-Ann, his wife, "to whom the Sphinx had confided his secret, which was timidity." His love for this uncultured woman was extremely fine, and pathetically complete; her death leaves a scar which not even the attentions of the Empress of India can erase!

Disraeli's character is one of ambition, patience, and generosity. His motto becomes, "Never explain, never complain," and he lives by it throughout his life, in the course of which we are brought into Scott, Louis-Philippe, Bulwer-Lytton, Gladstone, Peel, and Bismarck.
