Vienna Choir Boys Sing Charmingly In German Movie

Camaraderie, Boyish Heroism And Lack of Usual Romance Mark Picture

ALPINE PHOTOGRAPHY ESPECIALLY DRAMATIC

Goodhart Hall, March 23.—The Vienna Choir Boys, who sang at Bryn Mawr in January, reappeared in a German movie, The Orphan Boy of Vienna. The setting of the sentimental story showed both the school life and the travels of the young choristers. Their excellent singing was recorded in the Viennese cathedral, in open air busses and at their summer hotel in the Tyrol.

The story concerned an orphan, Toni, who joined the group of Choir Boys, aroused fatherly affection in a musical tramp, Joseph Blueml, and after heroic sacrifice, won the motherly love of Schwester Maria, a nun who was housemother to the 80 boys. H. J. Laski Will Discuss Toni pleaded guilty to a theft when suspicion pointed to Maria, and having left in disgrace, nearly drowned Professor of Political Science is in a brook. The lost money was found and Toni, now a hero, revived while Maria rubbed his hands and his fellows sang an open-air mass on a spectacular-mountain slope.

Plentiful and varied singing contributed to make the total impression charming in its sincerity and simplicity, despite the melodramatic plot and jerky filming. In the cathedral at Vienna, Toni first showed his interest in music when he heard the Teacher," to their manager gained don. him admission to the choir.

Influx of Metals Caused Price Rise In 17th Century

Lecturer Discusses Economic Change, its Consequences And Causes

EARLIER EXPLANATIONS EXAGGERATED FOUND

Goodhart, April 4 .- The first of a series of six public talks under the Lecturer in Interview Mary Flexner lectureship was delivered by Dr. Edwin Francis Gay on the subject of The Price Revolution in England; its Causes and Consequences. Dr. Gay who is a Professor nomic History of England During the Renaissance (1485-1640). In his later lectures he will discuss the conflict between the inherited mercantilism of the mediaeval age and the rising capi-" talist system.

> Characterizing the price revolution as a west-European phenomenon, Dr. Gay traced its parallel courses in land. The average price rise in all the first half of the 17th century. In all, and particularly in Spain, this rise reflects the constantly increasing flow of silver and gold from America into Europe.

> Contemporary analysts declared the price revolution a result of any one of a number of evils, ranging from bad harvests to moral decadence. Finding most of their explanations exaggerated, Dr. Gay believes that the influx of gold and silver was certainly the principal cause, though most of the contemporary theories are partially true.

The price rise began in Spain in reached its latest peak in England in the middle 17th century. The course of the revolution was roughly similar heights to which prices rose. Since

Jack's a Dull Boy

There are enough sunburnt faces around to show that the period which is called the spring vacation was really a vacation for some But where are the snows of yester- nights, but you must spend all those nately, and to my own discredit, I am people. To be sure, most of them are underclassmen, and all of them are striking more because their ruddiness is unusual than because there is strength in numbers. They would probably be surprised if This Star-Dust they play us is not Church". In compensation for week- have I given or received tokens of they were told that their vacation was meant to be a reading period. Nobody went so far as to say it to the pallid souls who used it as one, but there seems to have been a tacit agreement to that effect. In some While gone and forgotten is the erst- spring, on walking tours and reading cases reading was actually assigned in books which could not be found in vacationing libraries, and for a big class there would be only three or four such technical books available from the college library. Another method of enforcing study was to schedule quizzes immediately after the holidays, or to give assignments for Monday, April 4, Swinging a leg in black stocking colleges, but the students "read" only upon my present absence from Bryn in first year courses. The most misleading, was the hour-or-two fallacy by which one was persuaded to do an hour-or-two for every subject.

We realize that a certain amount of work must be done, and that it cannot be done in the space of the college year. At least this is true of the upperclassmen. We think that our hand is being forced, not by any intent of the faculty, but by our own incapabilities. Either we must study in the holidays, or we must have a longer college year, or Of Memphis, St. Louis and Broadway, either "research students" like Elizathe work should be planned so that we could meet requirements and still be perfectly free in the holidays. The latter is a solution for those Blue 'cause you're leaving, blue 'cause who have time for more work, the second for those who are pressed for time already. The first does not agree with the definition of the word vacation. We are not advocating a longer year, because we cling to the hope that something can be done without it. Probably the people who work hardest now would work in the holidays even if the year were a month longer. We certainly do not oppose optional holiday study; we are cavilling because it is required.

The People's Choice

In our last issue we published the results of the hoop plebiscite and said that the question would not be closed until opinion was further clarified. The vote was 184 to 113 in favor of preservation of the tradition, more than a two-thirds' majority, so that there is no reason for not considering it a democratic decision and abiding by it. in Love Again. Unfortunately, a vote always divides opinion to such a degree that a minority must exist. And perhaps because it is not privileged, it is pany. regarded by various people, including Ibsen, to be right, which is annoying for anyone who has happened to vote with the majority. We do not intend to say who is right in this case; we do want to point out the large minority which was created simply by the vote, and which represents a group of discontented people.

The only way the majority can recognize the existence of the minority idea is by making a concession. They can make very few concessions, however, under the present circumstances, without ruining their hard-won tradition. But since the object of burning the hoops was to make college life as painless as possible, we think that in deference to the 113 who voted for destruction, some pain should be eliminated. As a mild start, the seniors might abandon their old custom of skipping around Goodhart with hoops, and skip around only Wednesday, The Baroness and the with May baskets. After all, it is as bad not to have any hoops as not to get any, and skipping is a superlative way of attracting attention to oneself.

rampant in this period, the powerful and economic controls." While affirmprice corners which might have aug- ing that social cooperation, voluntarily mented the rise petered out by the given, is becoming more and more demiddle of the 16th century. Luxury and dissipations were also stigmatized by contemporary writers as responsible for the rise. However, the standard of living of the majority of the working classes was falling in this period, and the increased wealth of the few could hardly have caused price changes on commodities used by

The bad harvests of the 16th century have been seized on by many writers in explanation of the rise. Pointing out that these disasters were only occasional, Dr. Gay denied that they were fundamental causes of the price revolution, though probably they accelerated the existant movement at various times.

The French civil wars and the 30 Years' War seem to have had surprisingly little affect on prices, although they certainly disrupted agriculture and other economic activity to a considerable extent. According to statistics on Bavarian towns, recently compiled by Elsas, prices rose only when war actively menaced the individual cities.

Some German writers have pointed to population increases as responsible for the price revolution. Their theory is born out by statistics for Germany, said Dr. Gay, but accurate information is not available for other countries. It seems unlikely that the English population change corresponded at all closely to the price movements.

In his next lecture, on April 11, Dr. Gay will discuss in greater detail the importance of the influx of gold and silver, and the monetary depreciation, as causes of the price revolution. He will also show the rearrangement of the class structure which resulted from the movement.

Summer School, A. S. U. Interest Van Hoesen

she has been chiefly interested in the Industrial Group, of which she was vice-president last year and president this year. The Group meets with industrial workers from the Y. W. C. A. of Germantown to discuss problems, with discussions sometimes prepared by the workers themselves. This year Group members have been going to union meetings.

This summer Martha is thinking of working under Miss Hilda Smith, of the Adult Education Office in Washington, in connection with the W. P. A. After she graduates, she hopes that sociology will open up a future for her. To encourage it, she will look for a job of some kind and then do graduate work (not at Bryn Mawr).
